

Amy Hernandez is a Composites & Adhesives Engineer at the Materials and Process Engineering organization of Pratt & Whitney. She supports the Polymeric Materials group in the areas of organix matrix composites and adhesives. Amy is originally from Mystic, CT and is the first engineer in her family! She received her Bachelor's Degree in Material Science & Engineering as well as a Master's of Engineering and Composites Graduate Certificate from the University of Connecticut. Throughout her career Amy has enjoyed volunteering in STEM Outreach and the recreational group Latino Outdoors. Outside of work she spends time traveling, hiking, kayaking, drawing, and playing tennis.
