

A graduate from UConn with a Bachelor of Science in Electrical Engineering, Heather Fabian's creative spirit and passion for problem solving have propelled her to a career in engineering systems for the built environment. While a student at UConn, Heather was heavily involved in the Society of Women Engineers (SWE) while also participating as an Engineering Learning Community mentor and a teaching assistant in the Engineering Diversity and Outreach Center for the Pre-Engineering Program. Her dedicated industry involvement and superior attention to detail opened the door to her career with Consulting Engineering Services, a Mechanical, Electrical, Plumbing and Fire Protection Engineering Design firm with six offices across the United States. Heather designs electrical systems for custom high-end residences ranging from New York City penthouses to 10,000+ sf, multi-building residential compounds. She is passionate about creating code compliant, safe and uniquely crafted systems for her clients to live in.
