

Karla Del Cid-Ledezma is a 3rd year PhD student studying Material Science at the University of Connecticut (UConn). She completed her Bachelors in Nuclear, Plasma and Radiological Engineering at the University of Illinois at Urbana-Champaign (UIUC). A first generation Latinx student, she has been a part of various organizations that involve outreach and inclusion of underrepresented minorities in STEM. At UIUC she was a Engineering Ambassador, which centered around outreach to elementary and middle school students. At UConn she serves as an officer in two different graduate organizations on campus; a Treasurer for the Material Research Society and as Vice President of Graduate Society of Hispanic Professional Engineers. She is also on the planning committee for the STEAM Tree Team, which will bring the first solar panel tree on campus at UConn. Finally, she was responsible for planning, organizing and hosting the Sisters in STEM conference.
